The Portlands beat, the Kents, Hills to-WASHINGTON, April 38. For a no In the Utilted States Court this afternoon the case of Dennia Kelley, for killing Frank A. Smith, at Fort Popham, was considered on the motion for a new trial.

The Commissioner of Pensions to-day directed the stepensions which have been drawn, although the pensions which have been drawn, although the pensioner is dead, in some class physions in, whose names pensions were drawn but been dead since 1871. The Commissioner has requisited the Attorney-General to bring suit against the pension when the transfer or the pension when the transfer or the pension when the pensio D. A. Meshor, of Portland, was before James Bradley, in Portland, jall for liquor pendent wife and children and has already money so uniquifully distursed.

> The opinion of Attorney General Garland as to the eligibility of Gen. Lawton to act as Mioistor to Russia contains an elaborate display lot the legal points involved. The Attorney General is of the opinion that Lawton is not affected by the uneuffecture at the time it was ordinary the offence on which the disability intense declared out they have to according to the offence of which the disability intensed is hand could not have been invested. the offence of which the disability imposed is based could not have been imputed; to him, for the reason that he had, by virtue of his pardon, become a new man, "endowed with new screed; and espacity," his guit had been "blotted" and he had become "as, innocent as if he had never committed the offense." The Attorney General therefore helds that Gen. Lawton is aligible to held civil office.

General Lawton Declines.

After the opinion had been given Gen.
Lawton was requested by Secretary Bayard
to continue his proparations to assume the
office to which he had been appointed, but
he persisted in declining to have his name
further considered in the matter. The
President then sent him a letter arging
his acceptance, but saying that if he persisted in declining the country must be the
loser. he Supreme Judicial Court operied at Cal-

Mr. Kelley Doclines the Italian Mission. Secretary Bayard told h Post reporter to-night that Mr. A. M. Kelley had deliliged the Italian Mission. Mr. Bayard would not, however, say whether or not Mr. Kelley would be naked to go to Russia in place of Gen. Lawton.

Agricultural.

There are few H any flowers so pleasing 28 pansies. Nearly overy one admirps them, and, with care in a few points, they are more easily cultivated than most varieties of plants. People who fall to have good plants and flowers should observe the following rules. Do not purchase old plants, thinking they will live on year af-teryear and do well. They seldom winwhen you han, but the plants will say be a forced when you han, but the plants will say than, but the plants will say then, but the plants will say the plants will sa res well more than one season. It is unwhen you hay thun, but the plants will as once as once in three or four years never look so well again. If you wish to buy plants purchase those which are still too young to bloot, and hake the soil very rich with well ratted stable in mure the general water table of the toy.

but it does require patience. The seed should have only a slight covering of light.

Off scarcely less importance from soll over them, should be watered well. There point of view, is the condition. soil over them, should be watered will have point of view, is the condition of the when first planted, and after that when-ever the ground looks airs, arever before it door-yards of many of our faint houses. begins to look dry and always before it gets very dry. The seeds will sprout in gets very dry. The seeds still sprant in from one work to three or four. Proba-ble they will keep integrably show the

Five Minutes Talk on Health.

Thus at this serious of the year that the good housewife is in by found builty on gaged in the top often unappressing task of the countries of the ings, that if the cleaning is confined to the observer that the work is only half done. In addition to this the tables are farmed. and the neglect of this attention witers entirely upon the male person of the fan-ily. In one general electron is may be stated that the Louse, blurn, shed, pig-sty, hemory, cull every processory haiding up-on the fain should receive a thorough and there are many basens why the spring is the best time. Of course, all of the buildings do not require the same attention that should be given to the house, but each and every building needs as ap-

It cannot be questioned that the aims inmary condition of the homestead, as found ! rathe unclear cellars, foul sinks, and my such cooms together with the decima-lited cublash and decaying vegetables in the ce far and doorying, experious in the ce far and doorying, are a produc-source of disease, and therefore any merthis which can be unopted to prevent an i-macesmoothless should deer secureful and thoughtful aftermore by every intelligent great SUMPTION person. The limits of such air affile as this make it increasing to confine our remarks to one or two saleut points, bebeyong that if these are falthfully curred out their notices de leuelts will indice further ribots in oth z directions. It is car purpose therefore, to consular some our purpose kinereture, to consease some of the deergers whill them a long to a best of the collars and knowless surround.

propulate belovistion - a

ong the liquide (2211ARs).

Some one has remarked that can dwells ong house night to have be cellar. This platement we believe be off inducembed, with the last interests of afficiency liquid to discover for our of the copy as to say that every fleeting house must be no means be without resulting from the control of the copy as to say that he without collars There are many h. stances where collar could be disputsed with just as well as not, and some Instan is where it should be, but there are others where it is adjust a measure, and which the good houseweet winds hardly know how to do without Wint words

a rice for the price. It considers do not not and delicated between which it is madelled to a constant of the mindelled to the constant of than the of a harse as the former historic death trap of Calculus the only difference being hother number of its victims Every model cellar should be well lighted properly ventilated and always day in the fill bond a ned properly ventilated and always thy Diese conditions should be always present, in indifficients these perturbed on the present of the new first the interest of the present of the new first the interest of the present of the new first the interest of the present of the present of the interest of the interest of the condition of the present of the interest of the present of the present of the interest of the present of th ery movible thing in the deliar to be taken out and thoroughly alread. Many of these things will need to be washed, and special care should be clare until they are not returned to the cellar until they are properly dry. If they can be allowed to remain out in the sam for aftew days, the trouble will be more than regard by their sweet, cleanly appearance. Especially must the vezetables be carefully overhanded. They should be picked over by hand, and only the sound ones be returned to the cellar. There is little danger of too much care in this particular. Again, all specks of mould, whether upon the ground or walls of the cellar, must be scraped off and zenoved. If the bottom of the reliar be cemented it should be washed up, also the walls, and in addition the latter should be made in the state of the allowers.

April a Sisso, a warrant in insolvence was found of Tombosco chains in lincolvence was considered to be the county of Tombosco chains in the latter of samples of the cellum per period to the distinction of the county of the cellum period to the distinction of the cellum period to the state of the distinction of the cellum period to the distin ery monable thing in the dellar to be takwalls, and in addition the latter should're

allow this is suicidal, and to attribute a stances to the providential dealings of God is blasphemy. We would strongly emphasize the importance of speedy attention to this matter From personal observation and study of

this subject we are led to believe that this is more common than many suppose. In one of the annual Reports of the State Bourd of Health of Massachusetts, we jead that "In a large proportion of the houses very rich well well ratted stable a mure or phosphates, and some chip-dut if you treshed. The remedy for this delibulty,

If you have the patience to raise punder whicher sgreat or such, or where or it may exist, is briefly told in three words.

The melting show in the spring often refrom one week to three or four. Probably they will keep appearing above the ground for a week or my after the first ones are seen. When the second leaves begin to start that smed the most enter Watch them, booking at them as often a several times a day, and if you's see some that seem to be withing and falling to the ground, then transplant every one that looks health. The trouble is they are "damping off," and that means the plants are moulding.

The falling show quickly codered it up, they are strengthen proved the most enter a contract the samples of the right shows an interpolate the most enter a contract the samples of the right shows an interpolate the samples of the right shows the same that seem to be withing and falling to the provided that the same that some the falling show and the samples of the right shows the same that some time if you see a little samples of the right shows the same that some them all, but we are sure that looks health. The trouble is they are "damping off," and that means the plants collect grounds, a little squares, partially a little start in the same time in
